PAEDIATRIC
CARDIOLOGY

Scope of the Journal

The distribution of a printed journal is inherently restricted, and may unintentionally exclude potentially interested readers who are unaware of the publication, or are unable to obtain it within a reasonable period of time, or cannot afford to subscribe to such a publication. The paediatric cardiology subspeciality is easy to illustrate by means of pictures, and the World Wide Web constitutes an ideal medium for the dissemination of graphical information, due to the ease and low cost of production of images on-line, rather than as formal printed images.

The scope of the Journal is therefore ...

... to illustrate graphically the subspeciality of paediatric cardiology by means of on-line pictures of

- **Patients**
- **Electrocardiograms**
- **Peroperative photographs**
- **Conditions**
- **Echocardiograms**
- **Post-mortem photographs**
- **X-rays**
- **Angiograms**
- **Other imaging techniques**

There are numerous web sites dealing with paediatric cardiology, that cater for non-professionals and for health care providers. This Journal is a paediatric cardiology publication aimed at professionals only, and is the first, exclusively on-line, paediatric cardiology journal. It is *not* the aim of this site to compete with other Journals.

The contents of the Journal are meant to be used as a teaching resource. Downloading of material is encouraged for teaching purposes, provided that the Journal is cited or acknowledged. Written permission must be sought before material published in the Journal may be reused for purposes other than teaching (see disclaimer and copyright below).

A 'hard copy' of the Journal is also available on CDROM (see Journal subscription on CDROM).

Disclaimer and Copyright

- The opinions expressed in this publication are those of the authors, and are not attributable to sponsors, Journal or Editorial board.
- Readers of this Journal are free to view, reproduce or store copies of material from this Journal for personal, non-commercial use and for teaching purposes provided that said material remains wholly unedited and unmodified, that no fee or compensation is charged for access to this information, and that copyright notices and accompanying disclaimers remain attached. Uses beyond that allowed by the "Fair Use" limitations as stated in sections 107 and 108 of the United States Copyright law require permission of the Journal Editorial Board.
- Any uses or copies of Images Paediatr Cardiol, in part or in whole, must include the customary citation in bibliographic format, which includes author, publication date, and article title. Such usage should also include the Journal URL and a copy of the copyright notice.
- The material included in this Journal may not be sold or redistributed for profit in any way. This includes, but is not limited to, translations into foreign languages, mass archival as on compact disc (CD/CDROM), digital video disc (DVD) or other digital media, and inclusion in commercially published compilations (books).
- The editors, affiliates, hosts and associates disclaim any liability, loss, injury, or damage incurred as a consequence, directly or indirectly, to the use and application of any of the contents of this Journal, whether or not advised of the possibility of damage, and on any theory of liability.
- Images Paediatr Cardiol is provided "as is" without expressed or implied warranty of any kind, including, but not limited to, the implied warranties of merchantability, fitness for a particular purpose, or non-infringement. Descriptions of, or references to, products or publications does not imply endorsement of that product or publication by the Journal.
- The information contained in the Journal is not intended for self treatment, and cannot replace advice from a physician. There may be variations in treatment that physicians may recommend based on individual facts and circumstances.
- In particular, references made in articles may indicate uses of drugs at dosages, for periods of time, and in combinations not included in the current prescribing information.
- Neither the Journal, nor, its affiliates hosts or associates make any guarantee, express or implied, of the quality, fitness, performance or results of use of the information, products, or services found in these links. . These links are placed as a public service for the convenience of the users and may be withdrawn for any reason at any time without notification.
- Some of the links contain information of a commercial nature. Their inclusion here implies no endorsement.
- The editors do their best to ensure that external links are continuously updated.
